Education & Awards

Georgia Institute of Technology **Aug 2024 – Aug 2026**

- Master's in City and Regional Planning. Received Academic Excellence Award.

Brown University **Aug 2019 – Dec 2023**

- Bachelor's degrees in Computer Science, International and Public Affairs. 3.8 GPA.

Work Experience

Cooper Carry **May 2025 – Nov 2025**

Planning Studio Intern *Atlanta, GA*

- Utilized GIS skills to source, analyze, and synthesize spatial data that informed large-scale urban design and planning projects.
- Developed comprehensive design guidelines for both a municipal planning initiative and a major multifamily development, aligning recommendations with community feedback and best practices.
- Produced high-quality graphics, maps, and visualizations using InDesign, Illustrator, Sketchup, and Rhino to clearly communicate design concepts and planning strategies.

Center for Urban Resilience and Analytics **Aug 2024 – Present**

Graduate Research Assistant *Atlanta, GA*

- Developed an automated system for conducting large-scale inventories of bus stop amenities, leveraging an autonomous agent to navigate Google Street View, capture multi-angle imagery, and detect features using computer vision.
- Applied large geospatial datasets (e.g., GTFS) and advanced spatial analysis using Python tools such as GeoPandas.

Message Gears **May 2023 – Aug 2023**

Software Engineer Intern *Atlanta, GA*

- Completed 12 stories spanning the entire stack with a team of full-time developers utilizing AGILE practices. Implemented new UI features in a SPA application using Angular JS, integrating them into the backend by writing REST API protocols in Java.

Fortify Rights (NGO) **May 2022 – Aug 2022**

Research Intern *Remote*

- Discovered potential partnerships with other human rights organizations, profiling candidates through extensive research. Presented findings to entire team, pitching potential partnerships.
- Created a web application to streamline research processes and organize findings, enabling better comparison of data.

ProgenaCare Global **May – Dec 2021**

RND Intern *Atlanta, GA*

- Developed prototype product companion mobile app using Xamarin library (replaced by .Net Maui), including functional data-graph backend hosted on Azure and queried with Gremlin Query Language.
- Researched potential applications of artificial intelligence in the wound care process, including precisely tracking healing progress.

Sunrise Movement / Rhode Island Political Cooperative **Sept – Dec 2020**

Analyst / Researcher Intern *Providence, RI*

- Researched ways to retrofit affordable housing in Rhode Island with sustainable appliances and weathering equipment. Arranged findings into a formal policy brief.

Research & Projects

Tokyo Studio **Jan – May 2026**

- Used SUMO traffic simulation software to model impact of proposed network changes on flow of vehicle and pedestrian traffic.
- Presented findings to panel of government officials and neighborhood stakeholders.

Master's Thesis **Jan – May 2026**

- Researching effective flood resilience planning among rail transit agencies. Interviewed personnel from 4 transit agencies across the country, findings will be compiled into a formal white paper and distributed among participating agencies.

Skills

- Software: Extensive experience with Microsoft Office, R Studio, Adobe InDesign, Adobe Illustrator, Sketchup, Rhino
- Advanced spatial analytics using ArcGIS and Python (GeoPandas, Shapely, OSMNX) for geospatial data processing.
- Experience with traffic simulation tools, including SUMO and Mesa.
